

LEADERS IN TACTILE SIGNAGE, ACCESS AUDITS & DDA CONSULTANCY

Online Catalogue

Please find our Catalogue herewith based on our standard 25mm Ariel font manufactured in standard Pantone or BS colours. We can manufacture signage to meet your specific requirements incorporating logos, etc.

Note: If the sign description is followed by M, F, A, B or S, this represents male, female, accessible, baby changing or shower pictograms. Arrows are denoted with a number based on degrees – 90 representing right, 180 pointing down, 270 left, etc.

Our Standard Colours are as follows:

White On:

-  Blue
-  Green
-  Maroon
-  Black

These can be reversed

And:

Black on yellow 

The colour scheme involves us using contrasting colours, e.g. Blue with white text or yellow with black text. We can produce any colour you wish.

Please note that these signs and colours are for illustration only and the blue is just an example. Although the fire/mandatory signs (Bright Green, Bright Red, and Maroon) are these colours to meet current regulations. Our range of stock signs is updating daily.
